

Introduction

Atlantic Mining Corporation is hugely ambitious and expanding mining exploration company with interests in Brazil. With Australian Expertise in the mining of minerals including uranium, bauxite, nickel, gold and uranium we see great potential in areas of Brazil whereby virgin land with promising geography traits exist. AMC is the holder of important and promising land survey data already backed by land claims.

With exploration permits and modern techniques in place our first expedition will take place in early 2008 is confirmed with as many as 9 sites chosen for exploration. Listed in the Newcastle Stock Exchange in Australia (NSX) under AMC as well as the Brazilian stock exchange (Bolsa) the company is best suited to take advantages provided by Local workforce and Australian Capital funds investments , expertise and government incentives that are on offer by both nations.
